# Attention is the last real moat, and I build the engine that earns it

Where most agencies sell you posts, I run positioning, content, community, creators, and paid media as one connected effort, so attention turns into followers, followers into users, and users into revenue.

## Content that earns reach

Publishing systems, creator programs, and launches that get the brand seen

## Community that keeps it

Spaces and a voice that give people a reason to stay engaged

## Funnels that convert it

Paid media, email, and landing pages that turn reach into revenue

FanTV AI

SocialFi · X, Instagram, Discord, Telegram

The situation

FanTV had **around 70K followers and under 1,000 community members** when I joined, so I ran brand and founder content in parallel, scaled the KOL program past 100 creators, and led paid acquisition on a ₹45–50L monthly budget.

What I did

- Content system for the brand and the founder covering pillars, cadence, and formats
- KOL program scaled from roughly 10 to more than 100 creators at peak
- Community grown from under 1K to 150K+ through ambassadors, AMAs, and airdrops
- Full-funnel tracking in MoEngage across CAC, DAU/WAU/MAU, and D3/D7/D15 retention

# Fere AI

AI trading agent · X, email, YouTube, blog

The situation

Fere AI had a strong trading agent and **almost no users**, so I built proof-led content around the agent actually trading, benchmarked it against competitors, and put that evidence on every channel.

What I did

- Built the X content pipeline the brand still runs on today
- Reached #1 Fintech Product of the Day on Product Hunt and Top 2 overall
- Ran paid acquisition, referrals, and a points program to drive signups
- Launched the email program that landed Fere's first paying users

Defx

Perpetuals DEX · X, Telegram, Discord

The situation

Defx had a working exchange doing **under \$100K a month with about 50 traders**, so contests and KOLs brought people in while community and organic content gave them a reason to stay.

What I did

- Ran two trading contests, including a partnership with Voltrade
- Built KOL relationships and a community of people actually trading
- Produced UGC and organic content to build trust around the product

# Prashan Agarwal

Executive personal brand · X and LinkedIn

The situation

Prashan is the CEO of FanTV and the former CEO of Gaana, and I wrote everything in his actual voice, positioning him as a proven operator making a serious Web3 bet while running his accounts alongside the FanTV brand so each fed the other.

What I did

- Defined the positioning, pillars, and calendar across X and LinkedIn
- Wrote and managed every post directly with him rather than running a ghost-feed
- His reach humanised the brand while the brand built his credibility

**4X ROAS**

Opaque Studio, a luxury handcrafted home brand, had me run marketing end to end across Meta and Google at **₹3L monthly ad spend with a consistent 4X ROAS**, while Instagram grew from 30K to 41K through multiple collection launches.
